

# Pacific Energy Service

## Boilers & Water Heaters

### **Covid-19 Safety Protocols**

All customers that initiate a service request will be notified of our requirements before performing service and safety protocols that Pesi will take to ensure maximum safety for all.

1. Pesi will use gloves to prevent transmission while on job sites
2. Pesi will not send any employee who is at risk or exhibiting any signs per CDC
3. Pesi will practice proper sanitary measures put forth by the CDC on area in which they are working.
4. Pesi will take all break periods off site to reduce exposure and adhere to (6') social distancing
5. Pesi technician will work alone on the job and location must be secure without around.
6. Pesi will meet with contact person for a minimum time (IF NECESSARY)
7. No additional persons will be allowed in the work area – we will give only 1 warning
8. All doors and access points to the hot water equipment must be left open or accessible to avoid any unnecessary contact with personnel at the site.
9. With the “Stay at Home” order, parking will be a issue – so we will need close to equipment spot for our service vehicle.
10. All systems will be evaluated to mitigate any possible Hot Water interruption and will defer any work they deem to be discretionary and Not a safety related issue.

Pesi is here to serve you and understands this is a challenging time but we believe with your support and compliance we can get through this.
